

Informatik 11 – PHP Formulare

GET

formular.php (1a)

```
<form action="verarbeitung.php" method="get">
Ihr Vorname: <br />
<input type="text" name="vorname" size="20" maxlength="30" />
<br />
Ihr Nachname: <br />
<input type="text" name="nachname" size="20" maxlength="30" />
<br />
<input type="submit" value="Abschicken" />
</form>
```

verarbeitung.php (1b)

```
<form action="verarbeitung.php" method="get">
Ihr Vorname: <br />
<input type="text" name="vorname" size="20" maxlength="30" />
<br />
Ihr Nachname: <br />
<input type="text" name="nachname" size="20" maxlength="30" />
<br />
<input type="submit" value="Abschicken" />
</form>
```

POST

formular_post.php (2)

```
<form action="<?php echo htmlspecialchars($_SERVER["PHP_SELF"]);?>" method="post">
Ihr Vorname: <br />
<input type="text" name="vorname" size="20" maxlength="30" />
<br />
Ihr Nachname: <br />
<input type="text" name="nachname" size="20" maxlength="30" />
<br />
<input type="submit" value="Abschicken" />
</form>
<?php
if (isset($_POST["vorname"])) {
    echo "Ihre Eingaben<br />\n"
        . "Vorname: " . htmlspecialchars($_POST["vorname"])
        . ", Name: " . htmlspecialchars($_POST["nachname"])
        . "<br />\n";
}
?>
```

Informatik 11 – PHP Formulare

formular_ausgabe.php (3)

```
<form action="formular_ausgabe.php" method="get">
Ihr Vorname: <br />
<input type="text" name="vorname" size="20" maxlength="30" />
<br />
